EAA Chapter 100 is a nonprofit association involved in the promotion of aviation through adult and youth education, hands-on training, building and maintenance of experimental aircraft, and through community awareness programs.

This publication by EAA Chapter 100, Inc is for the use, education and occasional enjoyment of its members and others. No claim is made for the accuracy or applicability of information herein. Editorial content is the opinion of the contributor not necessarily the position of either EAA Chapter 100 or the Experimental Aircraft Association.

Reader submissions and comments are strongly encouraged.

### July Hangar Flying Event

Once again for the meeting this **Saturday**, July 13th, we hope to have another flying event (depending on the weather). We would like as many members as possible to fly your airplanes over to Dodge Center (KTOB). If weather permits we can show off our airplanes and hopefully do some flying.

Time: 10:00 AM

Location: Terminal Building/Ramp – Dodge Center Airport

Host: Dwayne Hora

### Chapter Picnic

This year's chapter picnic will be held Sunday, August 11<sup>th</sup> at the chapter hangar at the Dodge Center Airport. We are going to try and bring back some of the fun of the old days this year making this event a fly-in and cook out. We're hoping to put together some flying events and encourage everyone that can to fly over. Let's get those planes in the air!

### A Note from Dick Fechter

After reading the July *Sport Aviation* article (page 34) by Mike Busch, "Compression in Context", I have a question for chapter members. Should the chapter purchase a Digital Borescope for use by members?

Read the paper magazine or go

to: [http://www.oshkosh365.org/ok365\\_MyNews.aspx?id=1471](http://www.oshkosh365.org/ok365_MyNews.aspx?id=1471), sign in and click the tab at the right – "EAA Members Only". Then click the Sport Aviation Online Edition current issue. After reading the article, please give the chapter directors your opinion.

My opinion is that we should have one in our chapter tool box. I don't know the percentage, but my reading indicates many forced landings have been caused by some type of valve problem. If members with airplanes could look at their aircraft's valves (maybe take the picture to their A&P) we just might save some members a lot of grief, or maybe even the member

### 2013 Fly-In Breakfast Schedule

Here are some upcoming dates to mark on your calendar:

July 21 Forest City, IA  
Aug. 4 Cresco, IA  
Aug. 11 Chetek, WI BBQ 10:30-2:30  
Aug. 18 Mankato, MN  
Aug. 31 New Lisbon, WI  
Sept. 8 New Ulm, MN  
Sept. 14 Faribault, MN  
Sept. 15 Blue Earth, MN

## Good Links

Here's a great video of the Red Bull P-38 and Corsair doing some formation flying.

<http://www.military.com/video/military-aircraft-operations/flight/red-bull-p38-corsair-display-2013/2451103845001/>

This one never gets old. The CAF's B-17 over the Arizona mountains.

<http://vimeo.com/18135369>

\*\*If you have problems with the links, just copy/paste the address into your web browser.

You can always tell when a man has lost his soul to flying. The poor bastard is hopelessly committed to stopping whatever he is doing long enough to look up and make sure the aircraft purring overhead continues on course and does not suddenly fall out of the sky. It is also his bound duty to watch every aircraft within view take off and land.

*-Ernest K. Gann, Fate is the Hunter.*
